**Session (2019-20)**  
**Energy Saving Report**

**Importance of Energy Conservation:**

Energy conservation plays a significant role of lessening climate change. It helps the replacement of non-renewable resources with renewable energy. Energy conservation is often the most inexpensive solution to energy shortages, and it is more environmentally kind alternative to increased energy production. Since, we have limited quantity of non-renewable energy resources available on earth, it is very important to preserve energy from our current supply or to utilize renewable resources so that it is also available to our future generations. Energy conservation plays a very important role because utilization of non-renewable resources also impacts our environment. Specially, usage of fossil fuels supplies to air and water pollution such as carbon dioxide is produced when oil, coal and gas combust in power stations, heating systems, and engines of car.

**Activities:**

**1. Guest Lecture on Energy Conservation:**

Department of Electrical Engineering had organized Guest lecture on "Energy Conservation" on 14th December 2019 on the Occasion of "World Energy Conservation Day" for Second year students to raise awareness among the students about the importance of energy conservation, global warming, climate change, energy efficiency and promotes efforts towards saving energy resources.

## 2. Install LED lights

Replacing incandescent bulbs in laboratories with LED bulbs. LED bulbs cost more upfront but last 12 times longer than regular incandescent bulbs. LED bulbs will not only save energy but over time you end up saving money.

## 3. Display Board:

**Switch Off Appliances When Not in Use** such sign board are displayed in all the classrooms and laboratories in order to create awareness about energy conservations.

Electrical appliances like Lights, Fans, Idle printers, Desktop computers keep on using electricity even when not in use. Just switch them off if you don't need them immediately.

**CRITERION: 7.2 Best Practices****Practice I**

**1. Title of Practice : IIT BOMBAY VIRTUAL LAB** -An Initiative of Ministry of Human Resource Development (MHRD)

**2. The Goal**

Virtual Labs will provide to the students the result of an experiment by one of the following methods (or possibly a combination). Modeling the physical phenomenon by a set of equations and carrying out simulations to yield the result of the particular experiment. This can, at-the-best, provide an approximate version of the 'real-world' experiment. Providing measured data for virtual lab experiments corresponding to the data previously obtained by measurements on an actual system. Remotely triggering an experiment in an actual lab and providing the student the result of the experiment through the computer interface. This would entail carrying out the actual lab experiment remotely.

**3.The Context:**

- To provide remote-access to labs in various disciplines of Science & Engineering. These Virtual Labs would cater to students at the undergraduate level, post graduate level as well as to research scholars.
- To enthuse students to conduct experiments by arousing their curiosity. This would help them in learning basic and advanced concepts through remote experimentation.
- To provide a complete Learning Management System around the Virtual Labs where the students can avail the various tools for learning, including additional web-resources, video-lectures, animated demonstrations and self evaluation.
- To share costly equipment and resources, which are otherwise available to limited number of users due to constraints on time and geographical distances.

**4.The Practice:**

Virtual labs are conducted basically in the form of workshops in two ways:

- In house workshop- conducted for the faculty and students of our own institute.
- Out reached workshop- conducted for the faculty and students of other institutions.
- To conduct such workshops we need to schedule it on IITB web portal: [www.vlabs.iitb.ac.in](http://www.vlabs.iitb.ac.in).

**5. Evidence of success:**

- Few of the evidence of success are quoted as example as follows.
- Successfully organized various workshops of virtual lab tutorials for the students as well as faculties.
- Successfully organized the outreach virtual lab workshop for the P. R. Patil college of Engineering and Tech., Amravati.

**6 Problems encountered & Resources required**

The Problems encountered are as follows:

- Some of the Laboratories require separate registration for each of the experiment.
- Some of the simulators are under development so students face the problem while performing the experiments.

## VIRTUAL LAB SESSION REPORT

### ABOUT VIRTUAL LAB

Virtual Lab is an initiative of Ministry of Human Resource Development (MHRD) initiative under the National Mission on Education through ICT.

It started with the vision of "To enrich the learning experience through experiential learning of science, engineering and technology in a virtual learning environment at preferred pace, place and period (time)."

#### The Objectives of Virtual Labs are:

- Setup state of art virtual experimentation facilities (simulation) in selected areas of engineering & science
- Setup state of art experimentation facility in selected areas of Engineering and Science education which can be used both through remote access and on site experimental work
- Make these facilities available to all the educational institutions and students 24

### **Salient features**

- Virtual Labs will provide the students to understand the Modelling process of a real world system into an approximate version.
- Virtual labs will allow the students to Remotely trigger an experiment in an actual lab and get the result of the experiment through the computer interface.
- Virtual Labs are more realistic way of learning the subjects as it provides the technical input through audio and video streaming of an actual lab experiment and equipment.

### **PRPCEM a Nodal Centre of Virtual Lab.**

PRPCEM College of Engineering is recognize as a nodal centre of Virtual Lab IIT Bombay. Being a Nodal Centre under the guidance of IIT Bombay, PRPCEM College of Engineering can organize training sessions for students and faculty members on Virtual labs. Also by being a Nodal Center, PRPCEM College of Engineering can organize workshops as an outreach activity of Virtual Labs. Faculty members and students from nearby institutes may also be invited to attend the workshop or training programme.

## **Report of VIRTUAL LAB Sessions**

### **Background:**

Due to the rapid growth of Information and Communication Technologies (ICT) it has now been possible for virtual laboratories to be used as an alternative to physical labs by providing the merits of being used at anytime, anyplace, in this 'on-line learning' world of engineering education.

### **Objective:**

- ✓ To engage the students in the academics and bringing awareness about the Virtual labs.
- ✓ To educate the students about the virtual labs platform and guide them in conducting online experiments by using V-labs.

**Paln:**

The webinar is organized in association with IIT Bombay. The work shop is exclusive for PRPCEM College of Engineering Students. Students from 4th semester and 6th semester are allowed to take part in the training.

**Session-I:** 11.00 a.m. to 1.30 p.m. for Students of EXTC, CSE, EEE disciplines.

- The session is started with welcoming the guest and students. Also, the internal resource persons Mr. Aniket R. Pawade from EXTC were also welcomed.
- More than '66 students were participated during the session.
- Mr. A. R. Pawade started the session by giving introduction about the virtual lab and
- V-lab platforms. Later the session was taken by Mr. Aniket from EXTC department and conducted various experiments in the Electronics & communication domain.
- Over all 10 experiments were conducted during the session. The session last about more two hours.

Due to the rapid growth of Information and Communication Technologies (ICT) it has now been possible for virtual laboratories to be used as an alternative to physical labs by providing the merits of being used at anytime, anyplace, in this 'on-line learning' world of engineering education. Keeping this in mind, the Department of Electronics and Telecommunication Engineering conducted a session on **Virtual Labs** for the faculty members of the Department on the 02 July 2018 in the Signal processing lab, at P. R. Pote (Patil) college of Engineering & Management.

The aim of this session was to create an awareness on the utilization of web-based experiments, virtualization and simulations towards enhanced learning.

The session commenced with a brief introduction to virtual labs followed by registering to IIT Bombay site, filling all the details. Faculty members and students were explained about various labs and were assisted as they performed experiments in their domain.

The faculty members and students showed their enthusiasm in knowing about vlabs and they were keen on implementing it. The session ended with the feedback session. It was a very informative and interactive session. The entire session was coordinated by Prof. A. R. Pawade

## CRITERION: 7.2 Best Practices

### Practice II

**1. Title of Practice I:** *Free books distribution for enhancing ethical values in students.*

**2. The Goal :** In today's world the ethical values are becoming more and more negligible and people rather students are becoming practical. They are losing interest in the ethical values. To adapt this feature into the student's personality the practice of giving the books free of cost to the students so that at least they can read and acquire these values

**3. The Context:** It is seen that student's are becoming practical and very few of them carries the ethical values. So this practice will ultimately develop the morality in the students and will try to change the thinking of the students who are literally unaware of the consequences they are going to face in the real world. As they leave in the reality and with any failure they easily gets disturb and then loses the confidence in themselves.

**4. The Practice:** In this practice actually the books are issued to the department and practice is followed at the department level by distributing such types of books to the students who are toppers in their respective branches. By doing so no particular department will have to keep track of all this at department will maintain the record of every year books distribution and they can even easily find the toppers in their particular department.

**5. Evidence of success:** Few of the evidence of success are quoted as example as follows.

- More and more students are attracting towards this and they want such types of books.
- When the prayer starts in the morning they all stand up for the prayer without any caste or religious discriminations.
- They started helping each other in their failures. Also help them in their studies.

**6. Problems encountered & Resources required :** The Problems encountered was not as such only for receiving such types of books from the resources. We require the resources from where the books can be received easily. We search for such resources and get the variety of books.
