## **Student Mentoring Policy** **(Policy and Guidelines)**

### **Preamble**

Student Mentoring and Counseling is accepted widely as a part of the teaching-learning process especially in Higher Educational Institutions and it is more so in technical and engineering institutions. The core idea is that the students who come from rural, agricultural, and uneducated family backgrounds to pursue their higher studies or technical education need parent-like support, advice and, counseling not only in the curricular aspects but also to make them confident and to be tuned to the new environment and make them not-to- feel nervous or inferior in any aspect.

Mentoring is a strategy to provide students with emotional and instrumental support they need to achieve learning goals.

### **Objectives of Mentoring Policy**

The purpose of this programme is to identify intervening mechanisms to improve the performance of weak students and motivating bright students to excel in his personal and career life. In this context few objectives come across to achieve desired result.

- To focus and motivate students to achieve learning goals and thereby improve their academic performance.
- To generate interest in academics and other institutional activities amongst students.
- To provide students with information on preparatory courses such as bridge courses, skill courses, etc.
- To facilitate students in their personal issues which will turn help student to concentrate in their learning outcomes.

**Type of mentoring:** Professional guidance / career advancement / course work specific / laboratory specific / all-round development.

### **I. Details of mentoring system:**

- Each student will allotted with a faculty counselor, and each counselor will maintains a counseling record with details like parents/guardian's name, addresses, contact numbers and academic details, academic scores.
- Professional counselors are making available to all the students who are counseled individually, aided therapeutically, and will support in their aspirations related to academics, career plans; to air their grievances and cope with issues which may impede their progress in the above areas. Guest lecturers will be arranged for the preparation

- of competitive examinations i.e., MPSC, UPSC, career guidance.
- All student counselors will encourage the students' participation, apart from curricular guidance in co-curricular, extra-curricular and other professional activities, which will motivate them, stimulate their growth into well-groomed young professionals.
  - Parent meetings will be conducted once in a semester bringing parents into the monitoring / mentoring system as key stakeholders.
  - Follow up sessions with the parents/faculty and counselors will be regularly arranged with the students who have poor performance and attendance to enable them to improve their attendance and performance.
  - Department can take advantages of their alumni who are one of the most important assets. They are the people who represent the Institute in the real world. These networks slowly gained added importance in the development of the Institute because of their enormous outreach potential that benefits the Institute and helps current students in their career paths.

### **Mechanism of Mentoring Policy**

The mechanism for the above intervention programme which is to be followed by all departments as given:

- Mentoring programme to be organized every semester of each academic year.
- Appointment of subject teacher as mentors by the class teacher for every subject for each group to bridge the gap between learning skills and improve students' performance. Appointment of mentor teacher depends upon the level of difficulty faced by students in different subjects.
- Class teacher will prepare a schedule of meeting of mentors and students. Schedule of meeting should ensure that every subject teacher must have one meeting in a week with students. If there is a greater number of groups, schedule of each group can be kept every alternative week.
- To keep a track of performance of students, mentor teacher should conduct tests every month following the schedule prepared by the class teacher.
- Mentor teacher will take initiative in forming of peer learning groups of weak students and academically bright students and keep a record of the notices and schedule of the meetings. Class teacher will keep a record of list of student mentee, notice of appointment of mentor teacher and schedule of meeting of mentor teacher and student mentee.
- To check the outcome of mentoring, Semester End exam, ATKT exam result, status of student progression to be assessed to know the outcome of mentoring programme.
- Mentor teacher should identify gaps in communication skills of students. Students should be provided with the use of Language Lab to improve their English language skills. Subject teacher should prepare schedule of visit of students to Language Lab.
- Class teacher should inform parents about students with mentoring needs, the mentoring procedure and the desired outcome of mentoring.
- To motivate teachers to comply the procedure of mentoring policy, they should be awarded with certificates on improving the performance of weak students.

## Mentor

The roles of a mentor are different from those of an academic advisor, supervisor, and project/dissertation guide. To understand the contributions of a mentor, we can consider the multifaceted definition of mentors as individuals who

- Take an interest in developing mentee's career and well-being.
- Advance academic and professional goals in directions most desired by the individual.
- Tailor mentoring styles and content to the individual, including adjustments due to differences in culture, ethnicity, gender, and differences in student experience.

## Responsibilities of Faculty Adviser / Mentor:

- Be familiar with the personal history of assigned student including Educational and Family background.
- Attempts should be made to determine the reason for the student's problem, counsel, and provide guidance to the student to correct the problem and recommend a remedial program, if necessary.
- Assists student in periodic evaluation of his/her academic progress.
- Assists student in initial exploration of long range occupational and professional plans, referring him/her to sources for specialized assistance.
- Explains to the student the program in general and basic education as it relates to the branch of the student, and to preparation for life pursuits generally.
- Helps student understand and examine the graduation requirements for the curriculum leading to the bachelor's degree.
- Explains student importance of attendance and its implication to do well in examinations
- Explains importance of participation in the class activities
- Explains importance of Mid Examination (s) and its consequence in the end semester examinations
- Explains importance of marks in the previous semester examination and its consequence in the later part of the degree and subsequently in career as well
- Explains importance of submission of assignments and its consequence on the performance of Mid Examinations and End semester examinations
- Explains importance of laboratory exercises and their correlation with theory
- Helps the student explore the career fields in the student's branch of engineering and provides information about Higher education and job opportunities.
- Serves as a "Teacher Friend" to the student by demonstrating a personal interest in him / her and in his / her adjustment to college; by serving as a central contact person in obtaining information that can be used to help the student; and by allowing the student freedom to make his own choices after the limitations, alternatives, and consequences involved in making a decision.
- Explains importance of getting a meritorious Engineering Degree and how the degree helps in building a career in other areas and programs such as M.S / M. Tech, MBA, Civil Services, Group Services, etc.

**Guidelines & Suggestions for Mentor Meetings- First Year**

Session No.	Activity	Suggested Assignments	Suggested Points of Discussion
1	Get to know your students: Aspirations and Family Expectations	<p>1.1 Write 1-2 pages on a person you know who has influenced you a lot. You should have sufficiently interacted with that person. It may be a core family member / extended family member / teacher / neighbour. (It may be encouraged to write about two persons - one from family and the other from the extended circle. Students can write in Hindi, English or their mother tongue)</p> <p>1.2 Observe people around you - observe their behaviour. Whose behaviour influences you a lot? - for your self-development, self-understanding to emulate (i.e. to try to do like this or even better than this) in your life.</p>	<p>You can begin by introducing yourself (in brief) Get students to introduce themselves one-by-one Family &amp; schooling background, Hobbies &amp; interests, What I wish to be, What I wish to do in my life. Understanding my own goals, desires, feelings reflecting on my own actions/behaviour</p>
2	Importance of Gratitude	<p>2.1 Try to know at least one person whom we do not know well who is in the long chain of people helping to get our meal, or in maintaining living condition or in educating us, etc.</p> <p>Get to know the person, his or her family, background, current state of thinking and well-being.</p> <p>Submit a write-up in one week. Can we ever repay?</p>	<p>You may ask students to list people who have done things in the past or are doing things for them. How many people have we helped? - ask the students to think from their past experience. How many people are we helping now? Most students might realize that they are doing very little for others.</p>
3	Competition, Cooperation & Excellence	<p>3.1 Differentiate between Competitions, Cooperation &amp; Excellence. What is competition &amp; excellence?</p>	<p>Discussion about Teamwork- Everyone gives their best, based on their strength/talent, to surpass their individual performances.</p>

4	Aspirations / Goals	4.1 Make a list of your desires/aspirations. For each desire, ask "why". When you come up with an answer, ask "why" again! Keep doing it to get to underlying thought. Write the underlying need that you get (need for feeling or physical need for body).	<p>Work for the goal, not for self-glory. Your ultimate glory lies in it. To cover excellence properly, the following points may be noted:</p> <ul style="list-style-type: none"> <li>• One must be excellent in a chosen area/task.</li> <li>• Must also be able to do the associated tasks/areas.</li> <li>* Being excellent in one area is not enough. One must learn basics of other areas as well.</li> </ul> <p>Ask students to prepare a list of desires/aspirations in their notebook for about 5-8 minutes. Ask some students to read out their list and ask them to write it on the board in the form of bullet points with one or two keywords each. Avoid duplication. Make sure that you are not judgmental. Do not deride or make fun of any desire. Nor should you allow the other students to do so. Classify each desire into two categories based on what it is fulfilling:</p> <p>(a) Mental need (b) Physical need</p> <p>At the end, you can conclude the following:</p> <p>(1) The list is not infinite, but finite. It is only some tens in number. (2) Most desires relate to mental rather than physical need.</p>
5	Peer Pressure & Self Confidence	5.1 Narrate a situation where you had felt the Peer Pressure. What action did you take? - succumbed under the situation or tried to judge the situation in the perspective of Right Understanding and could overcome it? In either case, what was your mental feeling?	<p>'Peer Pressure' is a psychological pressure one experiences when one holding some "Pre-Conditions" (like Belief, Thought, Feeling, Behaviour, Action) which is different from the pre-conditions of people around.</p> <p>'Peer Pressure' forces one to Change / Alter one's 'Own Values' and adopt the 'Values of the Others' though the latter are actually NOT of substance.</p> <p>What insecurities come to your mind? What is the reason for being under 'Peer Pressure'?</p> <p>Lack of 'Self Confidence' on our pre-conditions (belief, thought, feeling, behaviour, action) on various issues make us vulnerable to 'Peer Pressure'.</p> <p>There are TWO kinds of 'Self Confidence':</p>

**2.5.2 Reforms initiated on Continuous Internal Evaluation (CIE) system at the institutional level (250 words)**

The Institute is affiliated to the university so the reforms suggested by the University has been adopted in curriculum, examination pattern and evaluation process. The Institute has appointed Chief Examination officer (CEO) who is university approved experienced faculty to deal with the university exam related matters. University has introduced online distribution of question papers and evaluation of answer sheets in examination of First year engineering from session 2015-16. The Institute has adopted Credit Based System for UG and PG programmes as per the reforms suggested by the University with effect from 2013-14. The Institute is also incorporating reforms in syllabus time to time as suggested by the University. Final year students Project work is evaluated through Seminars and Presentations conducted internally as well as through University evaluation process.

## Project Policy

### Project Group:

- Students are allowed to form groups consisting of minimum two or maximum of five members.
- If the students are not able to form the group, then the project coordinator will help them to form the group.

### Project Identification and Guide Allocation Process:

- The project coordinator instructs the students to identify the project titles and submit the synopsis adhering to the timelines decided by the HoD.
- Some of the areas identified by the project coordinator are:
  - Industrial Automation
  - Power System Protection
  - Power System Operation and Control
  - High Voltage Engineering
  - Electrical machines
  - Control systems
  - Renewable energy
  - Power Electronic Drives

The seminar at pre-final and final years by the students will be on the current industry Needs. The seminar committee ensures that the students choose advanced concepts in allied research areas with a lot of relevance and applicability. The Department announces the final schedule and guide for the seminar. The guide along with other faculty assesses the Technical seminar presentations given by students. A sample format of Technical Seminar evaluation sheet is shown in Fig

- One seminar will be conducted per student in the final year 8th semester by a committee consisting of the Head of the Department and three senior faculty members of the department who shall be the Seminar Coordinator(s).
- Seminar topic shall be selected from the emerging technical areas.
- The Department announces the final schedule and guide for the seminar.
- The Internal Assessment marks are given based on the evaluation done by the committee members (Head of the Department and Seminar Coordinator(s)) along with the guide and reviewer following the rubrics set by the department as follows in table

**Project work Evaluation:**

- a. **Internal Evaluation:** The project work and the report will be evaluated by internal committee at Phase-1; Phase-2 & Phase-3 is presented in Fig. 2.2.3.d.
- b. **External Evaluation:** The project work and the report will be evaluated by internal and external examiners appointed by the University.
- c. The external examiner will be from other SGBAU affiliated Institutions.
- d. The examiners will take presentation and demonstration followed by Viva-Voce on the project work carried out by students. The students need to defend their project work.

**Completed projects / Working model:**

- Department supports students to participate and present their completed project in various national and international conferences and conducted National Level Project exhibition with other departments to showcase their project in our college.
- The best projects identified from the project exhibition are sent to different colleges/institute for participation in exhibition.
- The department even encourages the best projects to file patent/report Discoveries.
- The internal guide helps the students to publish their work in national/international conference and journal.

**2.5.3 Academic calendar prepared and adhered for conduct of Examination and other related matters (250 words)**

A committee of academic calendar is comprised by the institution. The committee consisting of Principal, HoDs and Controller of Examinations prepare the academic calendar well in advance before the commencement of the semester. The calendar outlines the semester class work schedule, internal examination schedule and external examination schedule. Academic calendar also includes total working days, assessment schedule, academic events, holidays, etc. in concurrence with the University calendar. The intended learning outcomes are achieved through Academic calendar, teaching plan and course material availability, classroom lectures, interactive sessions, laboratory sessions, library, class tests, self-study, assignments, seminars, presentations, etc.

**2.6.1:** Program outcomes, program specific outcomes and course outcomes for all programs offered by the institution are stated and displayed in website of the institution (to provide the web link)

## PROGRAMME OUTCOMES

**PO1. Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2. Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3. Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4. Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5. Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6. The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO7. Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of sustainable development.

**PO8. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9. Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10. Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11. Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12. Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## PROGRAMME SPECIFIC OUTCOMES

To prepare the Engineering graduates to

1. Apply fundamental knowledge to identify, formulate, design, and investigate various problems of electrical and electronic circuits and power systems.
2. Apply software tools for design, simulation and analysis of electrical systems, skill based technical training and to engage in life- long learning and to successfully adapt in multi-disciplinary environments.
3. Solve ethically and professionally various Electrical Engineering problems in societal and environmental context and communicate effectively.

Prerequisites:

Sl. No.	Subject	Description	Level of Study
01	Engineering Mathematics-III	Basic of different transform	3 <sup>rd</sup> Sem
02	Engineering Physics	Application of physics in engineering	1 <sup>st</sup> Sem

Course Objective:

1. To understand different modulation and demodulation techniques in analog communication.
2. To interpret the performance of analog communications systems in presence of noise.
3. To understand concept of various antennas and their radiation patterns.
4. To study the fundamentals of transmission lines and their properties.

Course Outcomes:

On completion of this module the student will be able to:

1. **Tell** the necessity of modulation and identify the various components of analog communication systems.
2. **Summarize** different modulation and demodulation schemes in analog communication systems.
3. **Compare** and contrast the strengths and weaknesses of various communication systems.
4. **Examine** the properties and characteristics of Transmission lines and antennas.

Gaps Identified in curriculum for subject:

Sr.no	Gap Identified	Remedial Action Taken
1	Practical Implementation through Advance tool like MATLAB needed to be explored	SD LAB III (SETp9) includes LAB experiments. Also Virtual LABs demonstrated as content beyond syllabus.
3	Lacks to build ethics and professional Skills.	Content Beyond Syllabus Practice helps to do so. College Prayer makes students to earn qualities of a good human being along with a technical degree.
