**Training Program on "Fire Safety Awareness" for Non-Teaching Staff**

**On dated 30 June 2021**

**Report**

Fire poses a tremendous safety risk for workplace or organization – one of the biggest safety issues we see, in fact, yet one that is sometimes overlooked or underestimated. An important aspect of any prevention process requires the full awareness of the risks and impacts. Fire safety awareness is the important starting point in an educational Institute. Every employee shares the responsibility for fire prevention in the building or work site. It essential that Institute take the lead and create a shared awareness and knowledge in regard to fire prevention and fire protection.

Fire safety awareness training is one of the requirements for fire safety for non-teaching staffs including laboratory personnel and should be taken as a priority in the college campus since a large number of students are gathered at one place during class hours and in laboratories. Most deaths and injuries from Fires are the result of people not knowing the proper fire safety and exit strategies to follow.

With an objective to create awareness about fire safety and the usage of fire extinguishing equipment, IQAC organized a Fire Safety Awareness Programme was conducted at PRPCEM in collaboration with the Certified fireman, PRPCEM, Amravati on June 30, 2021.

The programme aimed at making the employees of the Institute mindful about fire hazards and the safety measures which can be taken during fire emergency. With proper training non-teaching staffs can eliminate fire hazards and respond quickly and efficiently in case if fire. Without proper training a small occurrence of fire can quickly grow to become a major incident with devastating outcomes.

**Training objectives**

- Make non-teaching staff aware of Fire and its risk.
- Teach them how to detect where dangers are, avoid and report them
- Teach them how to behave properly in daily working situation
- Teach them how to behave in case of fire accident or incident
- Learn them what instructions (do's and don'ts) to be given to students in the laboratory

### Key areas where non-teaching staff were trained are

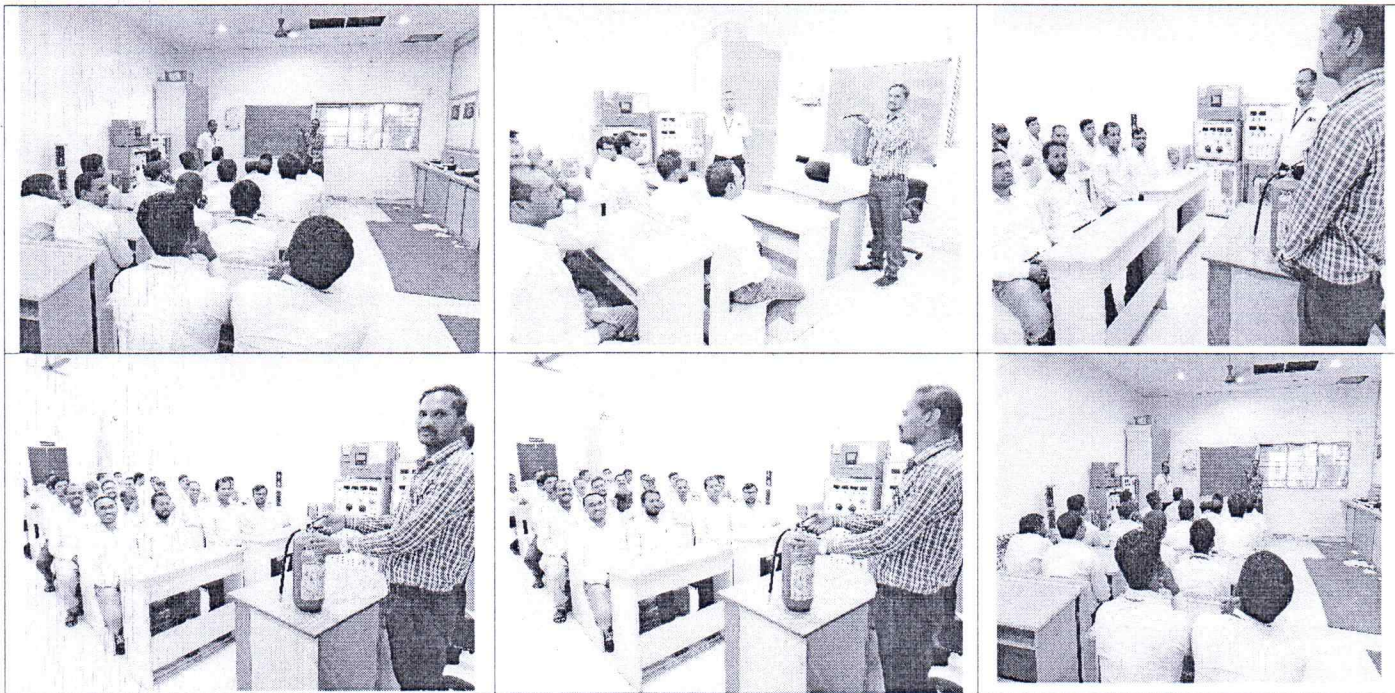

- How fires start and spread
- Steps to take to prevent fires
- Methods of extinguishing fires
- Types of firefighting equipment and their uses
- Smoke and gas hazards produced by fires
- What to do in the event of discovering a fire
- When not to tackle a fire
- Key responsibilities

### The Training experts -

- Mr. Vikas Ambadkar, Certified Fireman, PRPCEM, Amravati
- Dr. A. A. Ghute, Department of Electrical Engineering, PRPCEM, Amravati

Total 47 participants were trained with learning tools and practical demonstrations in the campus.
